

ACKNOWLEDGEMENT

I would like to thank Professor Luís B. Sardinha for having given me the opportunity of conducting my PhD process in the Exercise and Health Laboratory of the Faculty of Human Movement/Technical University of Lisbon. I am very grateful for his encouragement and support in filling out many gaps in my knowledge. Thanks also to all the colleagues and researchers, MS Claudia S. Minderico, MS Paulo Rocha, MS Teresa Branco, Ms Alexandra R. Ramos, MS Sandra Martins, Mr Elvis Carnero, Dr. Pedro J Teixeira, Dr. Fátima Baptista, and Dr. Helena Santa-Clara from the Exercise and Health Laboratory for the important support and wonderful time spent together.

I also would like to express my heartfelt gratitude to Dr Steven B. Heymsfield an outstanding researcher for having received me during six month in the Obesity Research Center, St. Luke's Roosevelt, Columbia University and for the unconditional help. Many thanks for Dr Stanley Heshka for his total support and guidance.

My gratitude to the several colleagues and scientists for all the cooperation as co-authors of my published articles. Without their support my accomplishments on human body composition would not be possible. I specially wish to express my gratitude to Professor Richard N Pierson Jr., Dr ZiMian Wang, Dr. Wei Shen, Dr. Angelo Pietrobelli, Mr. Jack Wang, Dr. David Allison, Dr. John F. Aloia, and Miriam E. Nelson.

I would like to express my gratefulness to the Portuguese Foundation for Science and Technology and the European Social Foundation on the domain of the 3rd communitarian board for their support during my PhD process.

Finally, more than gratitude, I would like to highlight and recognize the determinant role of my parents, Álvaro Silva and Rosa Maria Silva, and the rest of my family for their constant support and encouragement in achieving my endeavors.
