

## CONTENTS

### *Índice*

#### **Acknowledgements**

*Agradecimentos*.....3

**Abstract**.....5

*Resumo*.....7

#### **General Introduction**

*Introdução Geral*.....11

#### **Chapter I - Egg volume, energy content and fatty acid profile of *Maja brachydactyla* (Crustacea: Brachyura: Majidae) during embryogenesis**

J. Marine Biological Association of UK 88 (2008), 1401-1405.....27

#### **Chapter II - Fecundity, Brood loss, and egg development through embryogenesis of *Armases cinereum* (Decapoda: Grapsidae)**

Marine Biology 154 (2008), 287-294 .....35

#### **Chapter III - Utilizing egg fatty acid consumption during embryogenesis to develop and improve broodstock and larval diets**.....45

#### **Chapter IV - *Artemia* Enrichment Model – How to keep them Small, Rich and Alive?**.....75

**Chapter V - Productivity improvement of *Lysmata seticaudata*  
(Risso, 1816) larval rearing protocol through modelling**

Aquaculture 261 (2008), 1249-1258.....119

**Chapter VI - Modelling survival and growth of *Mithraculus  
forceps*' larvae and juveniles (A. Milnes Edwards, 1875)  
(Decapoda: Brachyura: Majidae) in aquaculture**

Aquaculture 264 (2007), 285-296.....131

**Chapter VII - Effect of starvation during late megalopa stage  
of *Mithraculus forceps* (Brachyura: Majidae) on larval duration,  
synchronism of metamorphosis, survival to juvenile, and newly  
metamorphosed juvenile size**

Aquaculture 274 (2008), 175-180.....145

**Chapter VIII - Productivity and Profitability of *Mithraculus  
forceps* aquaculture**

Aquaculture 283 (2008), 43-49.....153

**General Discussion**

*Discussão geral* .....163

**Errata**.....173
